

Don't miss this chance to get your team Lean Six Sigma certified and give them the tools they need to eliminate waste and lower costs in your company. Both courses, Lean Essentials and Six Sigma Green Belt, teach valuable process improvement tools and principles that have been proven to yield breakthrough results in manufacturing, healthcare, and service industries.

"This training was excellent! It gave our team the skills they needed to kick our Continuous Improvement program into high gear." – Val Jeffers

Who should attend?

Lean Essentials is a foundational course that every employee should attend. Whether you are in manufacturing or healthcare, operations or human resources, the Lean principles can be applied to improve quality, lower costs, and increase customer and employee satisfaction.

Green Belt dives deeper into operations principles for those who will lead process improvement projects and teams. Managers and leaders should attend to learn how to create a culture of operational excellence in their teams and organization.

Instructors

Craig Gygi - Craig literally wrote the book on Six Sigma. If you have read the best-selling book, *Six Sigma for Dummies*, you know that Craig is serious about helping companies get results. He made Six Sigma easy, practical, and useful for everyone. Craig has helped companies like Medtronic, American Express, Software AG, Abbott, and Discount Tire achieve breakthrough results.

Cedro Toro – Cedro is a certified Master Black Belt, CEO of Lean Six Sigma Toolbox and developer of the GEAR Model for Operational Excellence. Cedro has been helping companies like Consumer Reports, IM Flash, Wolverine World Wide, Mity Lite, and others improve their business processes and execute their strategy for over 15 years.

Green Belt certification projects regularly save companies between \$50,000 and \$500,000. This training provides an immediate return on investment.
